Office Action Summary

Art Unit: 1754

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 64-66 and 75-^{77 and 79}~~69~~ are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This is the same rejection as in paper 14, incorporated herein by reference.

Claims 64-66 and 75-77 and 79 are rejected under 35 U.S.C. 103(a) as obvious over Aibe et al. This is the same rejection as in paper 14, incorporated herein by reference.

Applicant's arguments filed 12/13/02 have been fully considered but they are not persuasive.

There is no support for two *ranges*; two specific temperatures are listed. This does not support the ranges claimed. Aibe teaches drying KI-loaded carbon, and this teaching is applicable regardless whether Pt is also present. No criticality is seen in the particular temperatures claimed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (703) 308-2539.
